ULYSSES and the GOLDEN FLEECE

COMPANY

HI-RES ADVENTURE #4: ULYSSES AND THE GOLDEN FLEECE and ULYSSES AND THE GOLDEN FLEECE are trademarks of SIERRA ON-LINE INC.

TYPE

ULYSSES AND THE GOLDEN FLEECE is a high-resolution adventure game.

OBJECT

In this game, you become the mythological character Ulysses. The king has received word of a fabulous treasure known as the Golden Fleece. He calles upon you to go and find this treasure and return it to him. If you can accomplish this task, you will be rewarded.

DIFFICULTY

This is one of the hardest of SIERRA ON-LINE'S adventures to solve.

DESCRIPTION

ULYSSES is the fifth adventure produced by SIERRA ON-LINE. It compares to WIZARD AND THE PRINCESS or CRANSTON MANOR (both SIERRA ON-LINE products) in size. It is as good an adventure as either, but a lot harder to play. One of the things that makes it so hard is that you can be a long ways into the game and come up against some obstacle, only to find you missed a small, well hidden clue back in the beginning. A good example of this is the problems involved with the dock guard. Another, is trying to pick which items to buy in the store. You must play a whole lot of the game before you know which items are the right ones; and when you do find out, you will probably have to start the game over from square one. One other thing which makes the game so difficult is that many of the puzzles you must overcome defy logical reasoning. Good examples are the solutions to getting over the fjord and getting through the wall of fire. Without a doubt the game is challenging, almost to the point of being too tough. If you are a beginning adventurer, this isn't the one you want to start with. On the other hand, if you think you're a seasoned adventurer ready for a good challenge, this game will fill the bill.

HELPFUL TIPS

Here are a couple of general tips that may help you to solve any adventure.

- 1. When it comes to computer adventure games the number one best tip is to make good maps. The first few times you play the game you will probably just be looking around getting familiar with the strange new world. From the first time you start the game you should be making a map. Adventuring is a very time consuming habit and a good set of maps will save you more time in the long run than anything else (short of having ADVENTURE TIPS & SOLUTIONS).
- 2. If the adventure has a "save game" feature, use it often. It's not very likely that you will solve any adventure in only one sitting and you may get tired of playing if you have to begin at the beginning every time you boot the game. Another helpful point here is that if you are at some new point in the game, and what you would like to try may prove fatal, save the game before you try it. If it turns out that you made the wrong choice you don't have to start completely over.
- 3. As you play the game, be sure you read all the descriptions given. Sometimes it is easy to overlook something important. Also, you should make it a point to examine or look at everything. Try reading anything that looks like a sign or has writing (or scratching) on it.
- 4. Try to go in every direction from each new room or point. If none of the standard directions work (N, S, E, W, U, or D), try the command "go ..." (such as "go hole").
- 5. Don't avoid mazes. Many good things are either hidden in mazes or on the other side of mazes. If you have problems with mazes try this: before you get to the maze try to gather up as many separate items as the game will let you carry. At the first room drop an item and mark this room on your map with that item. Go in a set direction from each new room, for example, always try north first. If this gets you into another new maze room drop another item. One important point in maze solving is that 99% of the time you will be lost, so the first thing you should do in a new room is see if you can get back to where you just came from. If you went north out of the last room, you should first try to go south to see if you can get back. This way, if you run out of items to drop, you can find your way out to get more items. It may take several tries before you are able to get a maze mapped out.
- 6. Periodically inventory the items you are carrying to make sure you have with you the things you think you have. Sometimes items are added or taken away without you knowing it.

Good luck and enjoy your adventure.

HOW TO USE THIS BOOKLET

Although this booklet will guide you completely through the adventure, doing so would destroy the fun of the adventure. If you find yourself stumped and frustrated, try going on to some other part. If you still can't get going, then stop playing for a while and let your computer rest. After the computer has cooled off, give it another try. Rémember that adventures are like any other good puzzle, they have to be challenging or they won't be fun. On the other hand, every seasoned adventurer has at one time or another reached the point where he or she is ready to use the adventure disk for firewood. That is where this booklet comes into play. Use it moderately to get past only the part you are stuck on and then try to continue on your own.

THE KEY WORD LIST

One thing that some people don't like about adventure games is having to guess the words that the computer will understand. The enclosed key word list will eliminate that problem. Let's say, for example, you were exploring a deep dark dungeon and you were confronted by a nasty monster. After trying the usual things like "kill monster", "attack monster", or "slay monster" (none of which works) you try some not so usual things like "kiss monster", "bite monster" or, after frustration sets in, "eat monster" and still nothing works. Looking at the key word list you might find the verb "hug", so you give "hug monster" a try. Not only does the computer understand, the monster smiles and shows you a secret passage!

QUESTIONS AND ANSWERS

Each question represents a problem that has to be overcome in order to complete the adventure. Since every person who plays the adventure makes different decisions at different points, it is impossible to lay the questions out in any set order. Normally, if you have a problem at the beginning of the game, the question will be at the beginning of the list. Go down the list until you find the question pertaining to your problem. Then turn to the answer section and find the number that corresponds to the question. The answers are coded in such

HOW TO USE THIS BOOKLET

a way as to make it very simple to find the answer, all you need is a pen or pencil. Each word in the sentence will start and end with the letter "Q" and have a "Q" inserted between letters. All you have to do is mark out the "Q's" revealing the answer. For example: "QLqiqqqhqtq qtqhqeq qlqaqmqp. " would look like "XLXiXqXhXtX XtXhXeX XIXaXmXpX." after it was marked out, revealing "Light the lamp." That is all there is to decoding the answer. After you get used to the system you will probably be able to "read between the Q's" without having to mark them out. With the answers coded this way, you can freely use the book without seeing answers you don't want to see. One other point you should know is that the last answer to each question is the final solution. All the others are clues leading up to the final solution for that problem.

MAPS

The maps are shown with the rooms numbered. Right after the map pages you will find the pages with a list of room labels. These are coded the same way as the answers to the questions. The reason it is done this way is so that you may use the maps from the very beginning without giving away any information. You can fill in the room labels as you get to them or get them from the list. While exploring an adventure you may find that a room has more exits than is shown on the map. In order to confuse a player a little more (as if we don't get confused enough), the game may describe a room as having two exits, one east and one going up. What you have to figure out through trial and error is that the two exits are the same, an eastward passage that slopes upward. When making the maps, I used the one that made the drawing a little less confusing. Therefore, your maps may not look exactly the same but you will end up with the same rooms. One other thing: be sure to read HELPFUL TIP #4 again.
